

Using osCommerce With CCBill Dynamic Pricing

osCommerce is a free, open-source shopping cart available to anyone that can now be integrated with CCBill's Dynamic Pricing with only a few simple steps.

Set It Up!

osCommerce must be installed prior to completing the steps listed below. Once you have osCommerce installed, follow these easy steps to install the CCBill module and you will be selling in no time.

You will need to contact CCBill to enable Dynamic Pricing for your subaccount, and to obtain information required during the installation of the module.

Server Placement With Shell Access:

1. In your Internet browser, access the URL <http://addons.oscommerce.com/info/6141>.
2. Click the Download icon  to the right of the description; follow the on-screen instructions to download the file *CCBill.zip* to your computer.
3. Use FTP to upload *CCBill.zip* to the main osCommerce catalog (often named *cart*) directory of your osCommerce installation.
4. Unzip the *CCBill.zip* folder in the main osCommerce catalog directory.
5. Refer to the *Install.txt* file in the extracted folder for further information.

Server Placement Without Shell Access:

1. In your Internet browser, access the URL <http://addons.oscommerce.com/info/6141>.
2. Click the Download icon  to the right of the description; follow the on-screen instructions to download the file *CCBill.zip* to your computer.
3. Unzip the *CCBill.zip* folder locally.
4. Use FTP to upload the extracted contents of the *folder* to the main osCommerce catalog (often named *cart*) directory of your osCommerce installation, taking care to copy the entire directory structure that was extracted.
5. Refer to the *Install.txt* file in the extracted folder for further information.

It is important that all files in the extracted folder are copied to the same folder structure on the site.

Installing the Module In osCommerce:

After you have placed the module on your server, it will need to be installed to your osCommerce installation.

1. Access the **Administration** section of your OS Commerce installation.
2. Click **Modules** on the left.
3. Click the **CCBill Dynamic Pricing** module to highlight it.
4. Click **Install**.
5. Click **Edit**.
6. Enter the parameters with the settings you have been provided by CCBill (*Client Accnum*, *Client Subacc*, *Form Name*, and *Salt* are required).
7. Click Update.
